

PUMP AND NOZZLE UNIT IN EXCHANGE

The injection fuel system for combustion engine

The own injection pump for each cylinder in a combined housing with the injection nozzle. For a faster pressure build-up between pump and nozzle. Direct, without diversions and disturbing lines. The pump and nozzle unit is reconditioned by a certified German partner and refurbished with original parts.

Also for this product group you will receive a maximum of Metzger quality and safeness.

- **as of now in the Metzger range**
- **reconditioning exclusively with original parts**
- **certified pump and nozzle unit**
- **immediately available**
